# 5. Performance of Underlying/Formula/Other Variable, Explanation of Effect on Value of Investment and Associated Risks and Other Information concerning the Underlying

The Call or Put Warrant is a leveraged Warrant with a fixed term, which gives investors a level of exposure from moderate to high to the price and performance of the relevant Index as described in Part A "Specific Provisions for each Series" (the "Underlying Index") that is greater than the capital invested. The leveraged nature of the Warrants means that any movement in the value of the Underlying Index will have a magnified effect on the value of the Warrants, both positively and negatively.

The Warrants are "Call" and "Put" Warrants.

With a Call Warrant Holders benefit from excess (if any) of the Settlement Price on the Valuation Date over the Exercise Price (divided by the product of the Exchange Rate Final, if any, and Parity).

With a Put Warrant Holders benefit from excess (if any) of the Exercise Price on the Valuation Date over the Settlement Price (divided by the product of the Exchange Rate Final, if any, and Parity).

On the Settlement Date, Holders will receive an amount, which may be zero, determined by reference to the performance of the Underlying Index and, if applicable, the performance of the Exchange Rate between the Index Currency and the Settlement Currency.

Information on each Index shall be available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A.

Past and further performances of each Index are available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Index may be obtained from the Calculation Agent : <u>markets.ch@bnpparibas.com</u>
